AX-S4 ICCP

ACCESS FOR . . .

"Plug-in" Connections for ICCP-TASE.2

Description

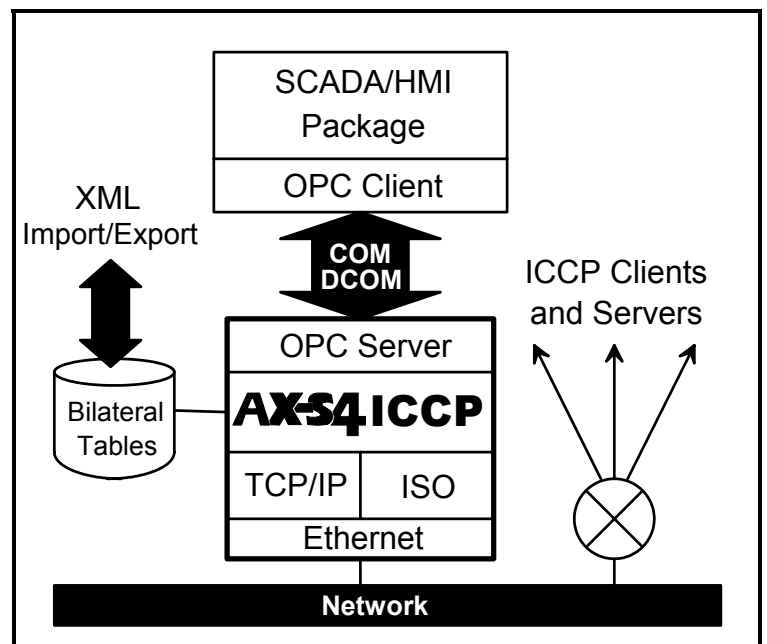

AX-S4 ICCP (Access For ICCP) is an OLE for Process Control (OPC™) server that provides ICCP-TASE.2 plug-in connectivity for any Windows® application supporting the popular OPC interface including many off-the-shelf SCADA and HMI products.

The Intercontrol Center Communications Protocol (ICCP) is an international standard (IEC60870-6 TASE.2) to enable integration of real-time data between the control centers of different utilities over wide area networks (WAN). ICCP-TASE.2 is being used world-wide to provide exchange of real-time data between control centers, substations, power plants, EMS, SCADA and metering equipment within the electric and gas utility industries. Applications range from small regional power dispatching networks to large supra-national transmission systems.

AX-S4 ICCP combines two popular standards (OPC and ICCP-TASE.2) into a single product to provide off-the-shelf plug-in ICCP connectivity for a wide range of existing low-cost off-the-shelf Windows applications supporting OPC.

Benefits

- "Plug-in" ICCP-TASE.2 connectivity without programming for OPC enabled applications.
- No proprietary interfaces.
- Lower implementation cost using off-the-shelf Windows applications.
- Uses field proven ICCP-TASE.2 technology for maximum interoperability with existing systems.

Features

- Compatible with Windows NT4/2000/XP
- Supports Blocks 1, 2, 4, and 5 of IEC60870-6 TASE.2 as both client and server via an OPC server interface
- Extensive support for standards including:
 - ▶ OLE for Process Control V2.05
 - ▶ IEC60870-6 TASE.2 Blocks 1, 2, 4 & 5
 - ▶ TCP/IP and OSI network transport
 - ▶ IEEE802.3 Ethernet
 - ▶ XML import/export of bilateral table configuration
- Supports redundant configurations with failover
- Includes GUI that supports automated configuration functions for simplified installation and setup
